

iwis solutions for medical technology

Demographic change has turned medical technology into one of the most significant megatrends of the future. For us, this is a great opportunity to channel our innovative strength, motivation and commitment into **intensive collaboration with our customers to develop new chain system solutions.** Together, we move the world.

Highly challenging demands

Medical technology, also known as biomedical engineering, can be divided into a number of sub-categories. The most important of these are diagnostics, therapy, nursing care, rehabilitation and the overall improvement of the quality of life.

Huge demands are made in terms of characteristics such as surface quality, tolerances, tensile strength, fatigue strength, lubrication (or absence of lubricant) and reproducibility.

We will be glad to provide support and advice for the configuration of the chain for your application!

Highlights

- Partner for development and engineering
- Highest constant quality and precision
- Best cost-performance ratio
- Cost-effective production in various countries
- Large number of iwis Group locations for global presence

iwis antriebssysteme regards itself as a **development partner** and technology leader who can help you to meet the challenges facing you. State-of-the-art **simulation and configuration tools developed in-house** help our design engineers to decide on the right products at an early stage.
