

iwis solutions for the automotive industry

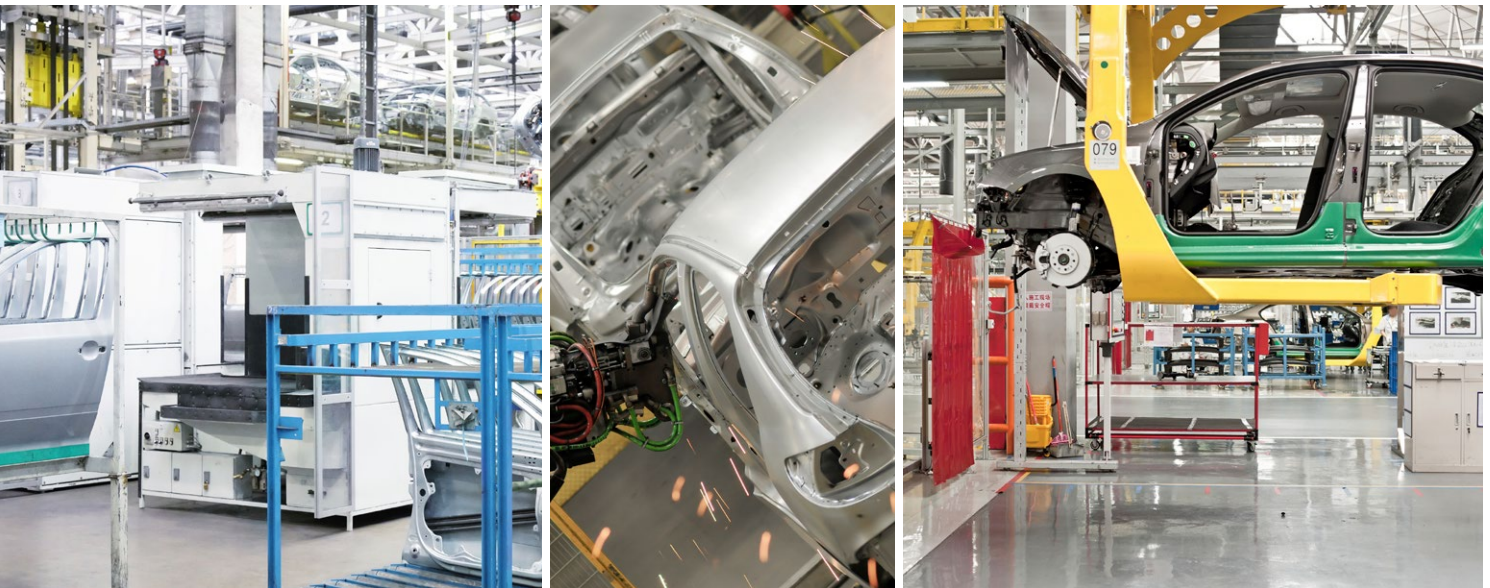

Innovative solutions are becoming increasingly important in securing the long-term future of the automotive industry. High cycle times and the just-in-time principle require **production components to be absolutely reliable**. Our **individual precision chain systems** make it easier for you to implement innovations and optimise the production process – because together, we move the world!

High quality and reliability

Not only is the automotive industry one of the largest and most diverse in the world, but it also requires extremely high standards from the manufacturers who supply components for its production facilities.

iwis manufactures precision chain systems and offers individual solutions for **critical factors** such as length tolerances, various temperature ranges, freedom from maintenance and the **highest possible availability** of our customers' production facilities.

iwis antriebssysteme – technology leader and your ideal partner for every transport solution!

Highlights

- Increased productivity and running times
- Greatest possible length accuracy and pair tolerances
- Optimum lubrication and sintered metal bushes for maintenance-free running
- Low-friction rollers save energy
- On-site help and support by iwis staff

iwis antriebssysteme regards itself as a **development partner** and technology leader who can help you to meet the challenges facing you. State-of-the-art **simulation and configuration tools developed in-house** help our design engineers to decide on the right products at an early stage.
